Subject: HB 5752 and 5753

Dear Angie Lake,

Please forward the following message to the members of the House Local Governments Committee:

Committee members, I am a member of the Tip of the Mitt Watershed Council, Lake Charlevoix Watershed Committee. We have been working to promote local and state ordinances to protect ground and surface waters from sewage contamination. House Bills 5752 and 5753 do not adequately address these issues because there is no clear implementation plan, no requirement to notify local health departments, no sustainable source for funding and no provision for low income funding. I ask that you reject the current legislation and replace it with a bill that allows for coverage of these concerns. Furthermore, it is wrong and undemocratic to try to ram any bill through that bans any local ordinance and that occurs in a lame duck session. Put the purity of our waters and the health of our people first and vote NO on HB 5752 and 5753.

Bill Henne
Charlevoix, Michigan
